DETAILED ACTION

Claims 1-14 are pending.

Restriction Requirement

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-10 and 14, drawn to a method for improving vaccination, wherein the method of disrupting sex steroid mediated signaling to the thymus is through surgical castration, classified in classified Class 119, subclass 174.
 - II. Claims 1-9 and 11-14, drawn to a method for improving vaccination, wherein the method of disrupting sex steroid mediated signaling to the thymus is through administration of pharmaceuticals, classified in Class 424, subclasses 184.1.
2. Groups I - II are different methods. These inventions are different with respect to ingredients, method steps, and endpoints; therefore, each method is patentably distinct.
3. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, a different field of search would be required based upon the various methods of use comprising distinct method steps. Moreover, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

Species Election

Art Unit: 1644

4. Applicant is further required under 35 USC 121 (1) to elect a single disclosed species to which the claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added.

5. If Group II is elected, applicant is required to elect a specific method for improving vaccination, wherein specific pharmaceutical is, for example, selected from the Groups recited in Claim 13.

These species are distinct because the methods for improving vaccination, wherein specific pharmaceutical is, for example, selected from the Group recited in Claim 13, differ with respect to the use of specific pharmaceutical; thus each specific method employing a specific pharmaceutical represents patentably distinct subject matter. Furthermore, the examination of specific pharmaceutical such as ones recited in the Claim 13 in the method for improving vaccination would require different searches in the scientific literature.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michail Belyavskyi whose telephone number is (703) 308-4232. The examiner can normally be reached Monday through Friday from 9:00 AM to 5:30 PM. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.
